Career Objective

A technocrat with proficiency in Programming and extensive knowledge of computer applications development. Looking for an opportunity in the field of backend / frontend / mobile application development in a renowned organization.

CURRENTLY PURSUING: Master of Computer Science (2019 – Present)

INSTITUTE NAME: University of Montreal (UDEM)

DESCRIPTION: I recently got admission in Master of Computer Science program in University of Montreal, Montreal. In my first semester, I currently enrolled in Machine Learning and Knowledge Processing courses. In Machine Learning I have been working on different classifiers and getting hands on experience on python by participating in the Kaggle competition and we have been working on Image classification project using the CIFAR10 dataset by using different classifiers.

In Knowledge Processing I have worked on the Applied AI. I have released a survey paper on the topic 5G & Autonomous vehicles and presented the paper with the presentation and we are also implementing a project in python for the same course.

For Winter 2020, I am studying Software Analysis and IT Security.
